

## Practices and Procedures at Camp: How we are currently updating our policies

Health Forms	It is <u>likely</u> that all Camp families will be required to provide additional health forms for 2021 that will include but not be limited to a vaccine status, COVID-19 health screening and a negative test.
Leading up to Camp	Families may be asked to quarantine for a period of time prior to arrival at Camp and may be asked to arrive at Camp having received a negative COVID-19 diagnostic test within the previous week.
Testing during camp	Each camper may be required to take a COVID-19 diagnostic test on the day of arrival. Our current plan will also involve testing prior to arriving at Camp. Campers may also be tested throughout the first few days of their summer, or later upon belief of possible exposure.
Health Center Enhancements	There will be a separate quarantine area for campers exhibiting symptoms associated with COVID-19 while at camp. This will be inside the health center. There will be a tent outside the health center to take care of routine health center needs (for example, band-aids, ice and prescribed medication). Should any members of our camp family exhibit COVID-19 symptoms, or if COVID-19 is confirmed through testing, one or more dedicated nurses will tend exclusively to that quarantined area and families will be notified accordingly.

<p>Sanitization Protocols</p>	<p>Sanitization protocols will be in accordance with CDC guidelines. Sanitization enhancements will include:</p> <ul style="list-style-type: none"><li>· A daily electrostatic spray will be used in all communal spaces with EPA hospital-grade disinfectant. · Hand sanitizer stations will be provided in every building, cabin, and high-traffic area. Handwashing will be required prior to all meals and snacks.</li><li>· Our staff will clean all bathrooms, shared spaces, and highly touched services multiple times each day. · Bathrooms will be sanitized frequently throughout the day in between the deep-cleaning to ensure frequently touched surfaces remain clean.</li><li>· Sports equipment used by a group will be sanitized before and after each use. Similarly, waterfront equipment</li></ul>
